Infodag Calls Smart Cities op 23 september - Morgen!

[Home](#)[About the partnership](#)[Who's who?](#)[Timeline](#)

Smart Cities and Communities

The European Innovation Partnership on Smart Cities and Communities

The European Innovation Partnership on **Smart Cities and Communities** (EIP-SCC) brings together cities, industry and citizens to improve urban life through more sustainable integrated solutions.

This includes applied **innovation**, better **planning**, a more **participatory approach**, higher **energy efficiency**, better **transport** solutions, intelligent use of Information and Communication Technologies (**ICT**), etc.

Invitation for Commitments

The Invitation for Commitments closed on 15 June. 370 eligible commitments were submitted by over 3000 partners. See [info graphic](#). All commitments are published on the online marketplace <http://eu-smartcities.eu/>.

The first public draft of the [Operational Implementation Plan](#) (2.15 Mb), the operational annex to the [Strategic Implementation Plan](#) (880 kB), has now also been published and gives a wealth of detailed examples for integrated smart city solutions.

Welcome to **STEP-UP**

Strategies Towards Energy Performance and Urban Planning (STEP UP) aims to bring together excellence on energy planning from four ambitious, European cities together with their industrial and research partners, running from Autumn 2012 to Summer 2015.

Mobile Age ensures the inclusion of seniors in digital public services thanks to the development of user-friendly mobile applications based on open government data.

Thus, it supports their access to civic participation, their involvement in their communities, and helps them benefit from open government data and mobile technologies.

Such mobile applications will be tested at co-creation workshops held in four pilot sites in Europe, namely UK, Germany, Spain and Greece.
